

The Best Solution is **Austin's**® for Winter and Summer.

DIRECTIONS:

Pour directly into your car windshield washer reservoir. Mixing is unnecessary. The product is ready to use. It is harmless to car finishes and protects to -20°F. Use the windshield defroster to warm the windshield during below freezing conditions.

CONTAINS: WATER (CAS #7732-18-5), METHYL ALCOHOL (CAS #67-56-1)

DANGER:

Cannot be made nonpoisonous. Use only in a well-ventilated area. Keep away from heat, and open flame. Avoid contact with eyes. It is not recommended to store windshield washer fluid inside the vehicle, neither in the passenger area or trunk. If the product must be transported, please secure the bottle in the trunk in a way to prevent spillage.

FIRST AID:

If swallowed: Give 1 or 2 glasses of water. Call physician, hospital emergency room, or Poison Control Center immediately for instructions to induce vomiting. When medical advice is not available, induce vomiting with finger or back of spoon. Get prompt medical attention.

EYES:

Flush with water for 15 minutes. Get prompt medical attention.

KEEP OUT OF REACH OF CHILDREN

WIND'S CHILLING EFFECT:

The wind chill temperature is how cold people feel when outside. Windchill is based on the rate of heat loss from exposed skin caused by wind and cold. As the wind increases, it draws heat from the body, driving down skin temperature and eventually the internal body temperature. Therefore, the wind makes it FEEL much colder. If the temperature is 0 degrees Fahrenheit and the wind is blowing at 15 mph, the wind chill is -19 degrees Fahrenheit. At this wind chill temperature, exposed skin can freeze in 30 minutes.

The only effect wind chill has on objects, such as car radiators, water pipes or windshields, is to shorten the amount of time for the object to cool. The object will not cool below the actual air temperature.

Below is the new NOAA National Weather Service guide for wind chill. Please keep this chart handy to help you plan your day when the weather gets bad.

NWS Windchill Chart

Wind (mph)	Temperature (°F)																			
	Calm	40	35	30	25	20	15	10	5	0	-5	-10	-15	-20	-25	-30	-35	-40	-45
