

## **Instructions**

### **DIRECTIONS FOR USE:**

Shake bottle before using. With the pump running, add 8 oz of Solar Shield per 15,000 gallons of pool water (500 sq ft of surface area). For best dispersion, add Solar Shield in front of pool return line and run the pump daily for proper circulation.

**Note:** In higher evaporation areas (ex: high temperature/low humidity), product can be dosed weekly. For weekly dosing, add 1 oz per 5,000 gallons of pool water (150 sq ft of surface area), one time per week.
