

Instructions

DIRECTIONS FOR USE:

For start up: use 16 oz per 10,000 gallons of pool water. Dilute in a pail of water and add to deep end with the circulation system on.

For freshly stained pools or discoloration of water from metals: add 32 oz per 10,000 gallons of pool water.

MAINTENANCE: 4 oz per 10,000 gallons of pool water added to the deep end weekly. Do not let pH of pool water fall below 7.0 or serious corrosion problems may result.
