

Instructions

One SpringPill treats up to 30,000 gallons

DIRECTIONS FOR USE

1. Insert blue piercing tool into large center hole.
2. Press firmly against hard surface until plastic is punched through.
3. Remove blue piercing tool.
4. With the pump running, place pill face up in the skimmer for 4-6 hours. Make sure to empty contents of pill prior to removal from pool.

DO NOT place chlorine tablets into skimmer at this time. Run the pump for a least 8 hours daily.
